PROFESSIONAL EXPERIENCE

Insights and Reporting Analyst

September 2021 – Present

U.S. Bank

Minneapolis, MN

- Explored data with SQL and Python (Pandas, NumPy, Plotly) as well as Tableau in order to test hypotheses and identify insights
- Used Tableau and Excel to analyze and visualize complex customer retention data for presentation to senior leaders and created slide decks distilling insights into a concise story
- Compiled external data sources and research to produce a monthly competitive intelligence report for a variety of audiences

Data Analyst

January 2020 – September 2021

U.S. Bank

Minneapolis, MN

- Developed and maintained self-service dashboards averaging 5,000 views per week in Tableau to communicate KPIs across consumer banking
- Queried, cleaned, and merged data from internal and external sources in a variety of formats (Hive, DB2, CSV) using tools such as SAS, Python, and Presto
- Created regression model with R to identify factors associated with retail sales growth which was used to identify exceptional branches for further study
- Developed and maintained SQL database and built data pipelines with Python (pyodbc, SQLAlchemy) to automate team's reporting
- Wrote various data cleaning Python scripts to help team with tasks such as constructing a management hierarchy from HR data and extracting appointment availability via REST API
- Designed, queried data, and analyzed results for several calling outreach pilot programs which informed lead list criteria and generated insights into customer sentiment

Business Intelligence Specialist

February 2017 – December 2019

Securian Financial Group

St. Paul, MN

- Automated reporting with VBA, Excel, and Access to improve both accuracy and efficiency
- Gathered requirements and designed reports for clients with SAP Business Objects and Excel

Application Developer

June 2015 – February 2017

Securian Financial Group

St. Paul, MN

- Led project to upgrade IIS-hosted vendor web application
- Supported Guardium data security platform

EDUCATION

Texas A&M University

M.S. Statistics

College Station, TX

January 2019 – December 2021

Augustana University

B.A. Economics & Computer Information Systems

Sioux Falls, SD

September 2011 – May 2015

CLASS PROJECTS

Loan Classification System: I used a boosted classification tree method with public Lending Club data to build a predictive model targeting debt consolidation customers and deployed an interactive tool using R Shiny.

Analysis of Danish ATM Data: I analyzed demand for Euros vs. Danish krone at ATMs in Denmark using a quasi-poisson regression model. Results were communicated in a written report and presentation.

SKILLS & PROFICIENCIES

Technical Skills: Statistical modeling (linear and logistic regression, GLM, time series), machine learning, clustering, PCA, data visualization, data wrangling, data cleaning, data analysis, technical presentation

Programming Languages: Python, R, SAS, SQL, JavaScript

Libraries: Python: NumPy, Pandas R: car, dplyr, ggplot2, glmnet, knitr, Caret, Shiny

Applications: Tableau, Git, VS Code, RStudio, SAS EG, Microsoft Office (Excel, Powerpoint, Sharepoint)
